Penticton Overhead Crane Ticket

Penticton Overhead Crane Ticket - The overhead crane is a common heavy machine used in industrial environments. This particular machine is referred to as a bridge crane and comprises parallel runways spanned by a traveling bridge. The part which lifts materials is the hoist. The hoist travels along the bridge.

Overhead cranes differ from mobile or construction cranes in which overhead models are utilized for manufacturing or maintenance applications where efficiency is vital. The steel industry usually requires overhead cranes. Steel is handled with an overhead crane at each and every phase of the manufacturing process, from the time the raw materials are poured into the furnace up to the time the finished coils are lifted onto trains and trucks.

Overhead cranes are also normally used in the auto industry and paper industry. The removal of heavy press rolls and other equipment at paper mills is carried out using bridge cranes. Bridge cranes are utilized so as to install the heavy cast iron paper drying drums as well as other huge machinery utilized in paper mills.
