

Penticton Manlift Ticket

Penticton Manlift Ticket - The Elevated Platforms and Manlifts Certification course helps to provide the needed training on the safe operating procedures, work practice, rules and regulations regarding the daily activities for the operators of this machine. The program has been designed for people who are actively involved in these activities or individuals who have a basic understanding of this machinery.

During the last couple of decades, aerial platforms and manlifts have become a common sight on construction job sites and in industrial maintenance applications. These machines provide an easy way to lift staff close to what has to be done on a stable platform apparatus, allowing workers to carry out tasks with greater comfort and safety rather than being perched on top of ladders or scaffoldings.

The manlift is like other industrial devices in that they are safe if used properly. Since they elevate workers above floor or ground level, accidents can easily take place and this can cause serious injuries or death for both the operators of the manlift and any passerby who may be unlucky enough to be standing underneath.

Manlifts come in a variety of models. Most fit into 1 or 2 categories: the scissor lift, which is capable of moving upward and downward and the articulating boom lift, which could move both vertically and horizontally.
